

# THE ROCK

VOLUME 35, NUMBER 4

NOVEMBER 12, 2007

[www.rockinghamcc.edu](http://www.rockinghamcc.edu)

## Concert by Triad Harmony Express Has Flavor of the Old West

Crank up those four, six or eight horses under the hood of your vehicle and head out to Rockingham Community College on Nov. 17 at 7 PM for a barbershop chorus performance of "How The West Was Sung." In this salute to the old west, Triad Harmony Express will sing all of your favorites including "Home on the Range," "Ghost Riders in the Sky," "Happy Trails," "Oklahoma," "Lone Prairie," "Ragtime Cowboy Joe," and "I'm On My Way."

"This is more of a show than a concert," said Dr. Robert Keys, president of RCC and a member of the barbershop chorus. "It has sets, costumes, props, lighting, and a very humorous script. Many have said it is the best and most entertaining show we've done in recent years."

Triad Harmony Express, the premier barbershop chorus of the Carolinas, will share the stage with two featured quartets: LET'S SING and Sound Counsel. LET'S SING members are Carl Stock and Gregg Zink of Greensboro, Mark Chandler of Winston-Salem, and Joe Doub of West Bend. Although they have been singing together less than one year, they were fourth place medalist in the seven-state Dixie District Contest held in September in Chattanooga, Tenn.

"They are excellent singers and great entertainers," said Keys.

Sound Counsel is comprised of Jeff Shulz of Hickory, Jon Vickers of Winston-Salem, Nate Pendley of Clemmons, and Keys.

In addition, the evening will feature a surprise quartet. Keys indicated the foursome have stolen the show in other performances.

"I can't reveal details," he said. "The surprise element is essential!"

"How the West was Sung" is entertainment for the entire family. The concert will be held in the Advanced Technologies Building Auditorium at RCC. Tickets are \$5 and can be purchased at the door. Admission is free to RCC faculty, staff and students.

What's better than one performance? Why two performances, of course! Audiences can still de-

## Preregistration Begins Nov. 12 for Spring Classes

Preregistration for spring class for currently enrolled students begins Nov. 12 and continues through Nov. 15. During this period students should meet with their advisors and sign up for classes. For students with advisors in the Math/Science division (including PE and Health), an advisement center located in SCI-113 is open from 9 AM until 7 PM. Advisors in many other division have posted schedules for appointments on their office doors. Official registration opens at 10 AM and continues until 7 PM each night.

Before students can register, they must remove any "holds" on their records. These "holds" may include unpaid parking tickets, outstanding library fines, or unpaid tuition bills from previous semesters.

Students should register early to get the classes they want. Every semester, many classes reach capacity well before the end of the registration

*Audiences still delight to the spirited and lively four-part harmonies of Triad Harmony Express, the premier barbershop chorus of the Carolinas. Its membership includes Rockingham Community College President, Dr. Robert Keys.*

light to the spirited and lively four-part harmonies of Triad Harmony Express, the premier barbershop chorus of the Carolinas at a second performance on Nov. 18. Among its membership, keen eyes may spot Rockingham Community College President, Dr. Robert Keys.

The chorus is known for its Broadway tunes, gospel, blues, music from the 1940s, and much more. At 7 PM on Nov. 18 in the Rockingham Community College Advanced Technologies building auditorium, Triad Harmony Express will present a concert so diverse, it will be a treat for all ages and musical preferences.

As a special treat, the concert will also feature guest singers, Bar None Quartet. The group is well-known for their extensive repertoire, a cappella music, and renditions of Beach Boy classics.

Triad Harmony Express is the chorus of the Winston-Salem chapter of the Society for the Preservation and Encouragement of Barbershop Quartet Singing in America, Inc. (SPEBSQSA).

Due to a grant from the RCC Foundation, Inc., the concert is free.

period. Popular times and classes fill very quickly.

Open registration for new, readmitted, visiting and currently enrolled students continues on Dec. 3-4 and Jan. 2-3. Each day, registration will be open from 10 AM until 7 PM.

Students who register with either WebAdvisor or with their advisors must pay for their spring classes by 5 PM on Monday, Dec. 10. Students who register for classes on Jan. 2-3 must pay for their classes by 7 PM on Jan. 3, 2008. Cash, check, debit card, VISA, and MasterCard are accepted. Students should pay their tuition and fess in the Business Office (located in the Administration Building). Failure to pay tuition and fees by the posted deadline will result in cancellation of the student's schedule. Students who have received a financial aid award letter will have tuition and fees deducted automatically from their financial aid accounts.

Classes begin on Monday, Jan. 7, 2008.

## Web Advisor

### Students Use New Technology to Register for Classes

There's a new way to register for classes at RCC--and over 280 students have already taken advantage of it.

Currently enrolled students have been using WebAdvisor, a service that allows students to sign up for classes on line. Before choosing courses on line, students meet with their advisors and determine which courses meet their educational needs. When advisor and student have reached agreement about these courses, the advisor removes an electronic hold on the student's access to on-line registration. Students who have no additional holds on their records (such as unpaid parking tickets, library fines, or tuition bills) can then use WebAdvisor to sign up for the courses they choose from those available in the schedule.

Test versions of on-line registration using WebAdvisor were run in the spring and summer of 2007 with very few problems. Both advisors and students reported that the process went smoothly and easily.

Now, instead of waiting until preregistration (Nov. 12-15), many students have gotten a jump on signing up for their spring semester classes.

New students must meet with an advisor to register for classes. They will not be able to use WebAdvisor for registration for their first semester.

All students can use WebAdvisor to do more than register for classes. Among other functions, students can use WebAdvisor to search for classes by time, location, day, and instructor; review course descriptions; check course availability in real time; print class schedules; view a summary of their financial accounts with the college check their financial aid status; or print an unofficial transcript. Best of all, students will be able to check their final grades for the semester long before they receive the printed notification by mail. Grades will be posted in WebAdvisor by 1 PM on Dec. 17.

## Jackson Heads Financial Aid

Last month, Marty Jackson of Danville began her new job as director of financial aid at Rockingham Community College, a position vacated by Coe Ann Pegg earlier this year.

After a career in the retail industry, Jackson turned to business and earned an associate degree in accounting at Danville Community College. She transferred to Averett University in Danville where she earned a bachelor's degree in business. For the past 10 years, she has worked for Averett University as manager of the university's Graduate and Professional Studies (formerly AACE) program, which serves adults returning to school.

That makes Jackson well aware of the needs of adult students and as director of financial aid at RCC, she has one main objective: to ensure all students receive the information they need in a format they can understand.

Jackson lives in Danville with her husband, John. The couple have two children, Derek and Shannon, and two grandchildren.

## Leonard Tells BLET Students: "Never, never, never give up."

by Lynn Brisson

Ken Leonard of High Point knows the power of a positive attitude. He explained it on a recent visit to the Basic Law Enforcement Training (BLET) students at Rockingham Community College.

In January 2006, Leonard was a fresh amputee lying in Moses Cone Hospital in Greensboro. About three weeks earlier, the 36-year-old's feet had been blown off by a roadside bomb outside Baghdad.

In his other life, the one with feet, Leonard served as a Master Sergeant in the High Point Police Department. He was hired in 1994 as a patrol officer. Like his grandfather, a New York policeman for 24 years, he wanted to make the world a better place.

Enter Iraq and an Iraqi police force marred by corruption, absenteeism and inadequate training. American policemen, both retired and active duty, joined American military police in an effort to train the struggling Iraqi officers. This, though, required active duty police to resign from their jobs and hire on as civilian contractors. Many were told if they did this, they wouldn't have a job when they returned to the U.S.

By 2004, Leonard was a member of the police Honor Guard, single, making decent money, visiting God at Easter and Christmas. When he approached High Point Police Chief Jim Fealy about joining the training effort in Iraq, Fealy said go, your job will be here when you return.

Leonard was assigned six police stations in Iraq. One housed insurgents who fired on Americans as they entered and left by the single available road.

But it was outside of the Baghdad green zone where Leonard's life changed. On Dec. 30, 2005, he and 10 American policemen left the city in a convoy of three armored suburbans. They headed for Taji, a U.S. base about 20 miles north. Leonard drove the lead vehicle. It was a familiar route, one in which orange barrels signified the four lane highway was narrowing to two. Leonard drove fast, a safety measure.

As he sped past the first barrel and approached the second, an unseen finger pushed a button and the world around Leonard blew up, his feet

Leonard told himself, "I'm not giving up. I want to become a police officer again."

strangely jarred. The suburban caught fire. Smoke billowed. Debris spattered. Gunfire erupted in ambush. Leonard was stuck in the suburban.

Behind him, the other two vehicles had stopped and were returning fire. Rodney King, a police officer from Graham, N.C., pushed Leonard's disabled vehicle out of the ambush site, allowing Leonard to pull himself out. He dropped close to the suburban for safety and looked at his feet – or the little left of them. The bomb apparently exploded in a small unprotected place, the space between the front tire and vehicle body where gas and brake pedals

### Dancing with the Zambian Vocal Group

Many found the recent concert by the Zambian Vocal Group lively and entertaining. Others couldn't help joining them on stage for a dance. Pictured above are Jeanna Bahena (second from left), Kayla Cary (seventh from left), and Christopher Prados (second from right).

### Buena Comida y Buenos Amigos

What better way to learn Spanish than by practicing at the local Mexican restaurant! Members of Stacey Davis's class recently visited "Monterrey" where they tried out their language skills and enjoyed a good meal. Front to back on the left are Matthew Davis, Jay Sikes, Jeanna Bahena, and Kayla Cary. Front to back on the right are Chris Prados, Chance "Clint" Barrow, Brooke Travis, Cornelia Bailey-Hunter, Morgan Dunlap, and Aaron Clark.

Your class or club could be pictured here! Help THE ROCK keep the campus informed. Contact Lee Dodson (ext. 2155) with your stories and pictures.

are situated.

The insurgents fled, but 45 minutes passed before help arrived. There was no help for Leonard's feet. Both were amputated at Duke University Medical Center before he was transferred to Cone Hospital where medical personnel began the process of teaching him to live out of a wheelchair.

What am I going to do, he wondered night and day?

During the long hours it came to him. I'm not giving up. I want to become a police officer again.

On Oct. 18, 2007, Leonard stood before the BLET students. He looked at a saying propped against the classroom's blackboard, put there by BLET instructor, Mike Murphy. "Attitude," it said, "is a little thing that makes a big difference."

Leonard smiled. "I love that. It says everything in a few words."

Without a positive attitude, he told the class, he wouldn't have believed he could become an officer again. He wouldn't have pushed himself. He wouldn't have overcome obstacles of severe nerve pain, unsteady balance, and unsuitable prosthetics. He wouldn't have worked through the dark moments of depression and frustration.

He definitely wouldn't have passed the POPAT (Police Officer Physical Abilities Test), even though Chief Fealy had told him if he could pass that test, he could return to the force at his former rank and pay.

Leonard knew the students before him would be facing the test in December. He knew they were nervous. He knew their attitude mattered because the POPAT is a grueling physical endurance test consisting of running, dragging a 150-pound victim fifty feet, racing up and down steps, crawling through a 40-foot tunnel, "body forcing" a 50-pound door open, executing sets of military style sit ups and push ups and at the end, after doing these activities multiple times, if the student is able to accurately name the two streets he was told to remember before the test began, he's through. If not, he has to run another 200 yards to end the test.

Official time cannot exceed seven minutes and twenty seconds.

Leonard's training for the test took a year. In his first POPAT run-through his prosthetics fell off in the tunnel. He lost his balance. Pain shot up his leg and he clocked in at 16 minutes. So he changed prosthetics, worked, sweated, strained and shaved the time to 13 minutes, then 10, then nine, and finally seven minutes and nine seconds.

"I thought it was a fluke. I was scared it was a fluke."

One week later, it was official. Leonard passed the POPAT in six minutes, fifty-six seconds. Greensboro police recruits and a Fox 8 News reporter and cameraman witnessed the miracle of attitude.

Leonard expects to be back on active duty by December or January. First he must pass a state exam and complete a shortened version of BLET training.

Standing before the students, his prosthetics visible under his pants legs, Leonard quoted Winston Churchill. "Never, never, never give up."

Who is Ken Leonard today? A man profoundly thankful to be alive. A man who says his eyes were opened in Iraq as he witnessed acres of people living in garbage dumps. A man whose heart was torn by the war-torn Iraqi children. A man who now visits God regularly; who sat in church one Sunday and met his love, a woman with a foot phobia and said her ideal man is one with no feet.

He's an humble man with a powerful and positive attitude.

**Rockingham  
Community College**

THE ROCK is published four to five times per semester during the fall and spring semesters by the students, faculty and staff of Rockingham Community College. THE ROCK cherishes contributions from its readers but reserves the right to edit all submissions in accordance with accepted style and space limitations. Articles and editorials which appear in THE ROCK do not necessarily represent the views of the students, administration, faculty or staff of this institution.

Rockingham Community College does not discriminate in administering or access to, or treatment or employment or admission in its program and activities. No person shall be discriminated against on the basis of race, sex, religion, age, national origin, or handicap. Inquiries may be directed to the Equal Opportunity/Affirmative Action Officer at the college.

## New Internet Science Course to be Offered in Spring Semester

by Mandy Comes

While scrambling during this registration period and trying to figure out what to fit it into your busy schedule, why not try a new science internet course? The Science Department will offer an internet version of Environmental Biology, BIO 140. When registering for this course, you must register for BIO 140-40 (3 credit hours) and its lab component, BIO

140A-40 (1 credit hour). This 4-hour credit course satisfies the science requirement for the Associate of Arts Degree and serves as a science elective for the Associate of Science Degree.

So what is Environmental biology anyway? Basically, Environmental biology covers topics such as environmental processes and the way humans influence these processes including population growth,

natural resources, ecology, global warming and other environmental issues.

For the laboratory portion of the class, BIO 140A-40, you will need to attend an orientation on Friday, January 4 at 11:00 AM in SCI 104B in order to pick up your lab kit. You will also need to purchase additional supplies costing approximately \$25 for an aquarium and bird feeder that you will set up and monitor throughout the semester as laboratory experiments. The only other requirement for this course is that you come to campus five times during the semester in order to take exams in the Math/Science Lab.

The class is taught by Mrs. Robin Gibson-Brown of New Bern, NC. She is currently teaching this course at Sandhills Community College and has had excellent feedback from many students. One student writes on the discussion board, "I've never been so amazed at the different things nature had to offer. Over the course of the labs that I have done, it has been astounding. While taking the virtual tour of the nature trail I noticed so many things. I've walked nature trails before and have never spotted some of the things mentioned within our virtual tour. It's amazing."

### *It's Not Too Late to Join the Science Club!*

Maybe you've seen the signs around campus about the Bake Sale for the Science Club, but thought to yourself, "RCC has a Science Club?" Yep, It's true!

In some form or another RCC has had a "Science" Club off and on since the 70's. The Science Club has had many names. Back in the 70's it was The Biology Club, in the 80's the Environmental Club, and back again. It even took a hiatus for a few years. The mission though has always been the same: to educate ourselves and others about the living, growing world around us and to be a help to our community.

Now we have broadened our horizons even more and branched out to observe all aspects of our world. This year the Science Club has planned many tentative activities. Already we have taken a trip to the Natural Science Center in Greensboro, NC and participated in Big Sweep.

The Natural Science Center is a small museum dedicated to educating the community about science. They have recently added a new outdoor zoo with exotics, as well as domesticated animals. The Center is still adding to the facility, and will soon have a wolf exhibit and a new planetarium. Classes are frequently taught there and field trips are very common. It is a much better place for children to learn about animals than the big zoos because they can pet many of the animals and the keepers are more

than willing to tell them about the exhibits.

Mentioned before was Big Sweep. This is a statewide effort to clean up communities. The Science Club took this opportunity to clean up the litter on the nature trail at RCC. We collected 12 bags of trash and odd items such as barbed wire, tires, and a bumper to a car. It was hard work, but well worth it. We plan to make it a yearly event for the Science Club. It wouldn't be a bad idea for us all to try everyday to keep Mother Earth clean and tidy.

The Science Club is planning a trip to Discovery Place in Charlotte to see the Body Worlds' exhibit and other trips to lectures, planetariums, hoping to organize food drives, and much, much more!

Sound good? Well, it's not too late to join. Just contact one of the following officers or advisor for details on an upcoming project or meeting. Officers include Cameron Martion (president), Traci Bast (treasurer), Erica Stephens (secretary), Kayla Cary (journalist), and Mandy Comes (advisor). We hope to see you at our next meeting!

### ***Don't Miss Our Deadline!***

The December issue of THE ROCK will be available on Dec. 10. All submissions for this edition must be received by Monday, Dec. 3. Please send all information to Lee Dodson in HUM-116 (ext. 2155). Help us keep the campus informed!

### *Planning to Study at a College in NC?*

#### ***This Scholarship Is for YOU!***

The North Carolina Extension and Community Association is offering a scholarship for Rockingham County residents. The purpose of this scholarship is to assist students in obtaining a degree at any NC college, in any field of study, with priority given to Family and Consumer Sciences.

A \$500 scholarship will be awarded each to one adult (an individual who has completed high school and has had a break in her/his education and wishes to further her/his education) and to one youth (an individual currently in senior year of high school or in college with no break in her/his formal education), to be paid in fall, 2008.

Applicants should be residents of Rockingham County. The winners will also be eligible to compete for a further scholarship at the District level.

Scholarships are awarded on the basis of a combination of financial need; scholarship potential; activities and honors; and connection or involvement with NC Cooperative Extension (4-H, NCCEA, etc.)

Completed applications are due by February 1, 2008.

To request an application form or for any questions, please contact Brenda Sutton, Extension Agent, at (336) 342-8231 or email [brenda.sutton@ncsu.edu](mailto:brenda.sutton@ncsu.edu)

Applications must be **completed and returned by February 1** to: Brenda Sutton, Extension Agent, 525 NC Hwy 65, Suite 200, Reidsville NC 27320.

## College Transfer Fair

Friday, November 16, 2007  
11:30 am to 1:00 pm  
in the  
Math/Science Building

**For more information contact Melanie Eley at 342-4261 ext. 2308**

Meet admissions counselors from:

Appalachian State University  
East Carolina University  
Fort Hays State University  
Greensboro College  
Guilford College  
NC A&T State University  
NC Central University  
Peace College  
UNC Chapel Hill  
UNC Charlotte  
UNC Greensboro  
UNC Wilmington  
Western Carolina University  
Wingate University  
Winston-Salem State University

**OPEN TO ALL  
RCC STUDENTS**

## RCC Leads in Podcasting

Where podcasting is concerned, Rockingham Community College is leading the pack among North Carolina's community colleges. Rick Leinecker, assistant professor of computer systems technology at RCC, began podcasting his lectures during spring 2007. Since then he has led a dozen seminars across the state concerning this latest technology and its uses in education.

The term podcasting was formed by combining two words: broadcasting and iPod. The latter is the portable media player designed by Apple. Podcasting is like radio in the sense that the listener can hear a program. Unlike radio, it is prerecorded rather than in real time. For Leinecker, it means he can record his lectures then make them available on the Internet as a podcast. Students can download the podcast and hear the lecture.

"Podcasting helps satisfy many learning styles," said Leinecker. "Some people are more auditory, some benefit from repetition. With podcasting you can listen to the recording on your computer, burn it to a CD, or download it to your media player, whether it's an iPod, MP3 player, or whatever, and then listen to it while you're mowing the lawn. You can use it as a review for tests or as reinforcement before the next class."

To encourage other RCC professors to use podcasting, Leinecker has developed a software program to make the process simple.

As far as Leinecker knows, his software program is the first of its kind. The program has no patent and can be downloaded at [www.podcastingopenresource.com](http://www.podcastingopenresource.com).

"A student at Guilford Technical Community College found a podcast of one of my spring lectures and wrote to say, 'This is great. This is really helpful,'" said Leinecker.

That is why he created the program and is encouraging instructors statewide to podcast their lectures. It appears to help retention and elevate academic success.

For RCC students, it is cutting edge technology used for their benefit.

For Leinecker, that is the bottom line.

## Governor Selects Maddrey for RCC Board

Elizabeth "Libby" Maddrey of Eden has been sworn in as a member of the Rockingham Community College Board of Trustees. Maddrey was appointed to the position by Governor Mike Easley.

A long-time civic servant, Maddrey has chaired the Rockingham County Library Board of Trustees and served as state president of the Women's Clubs of North Carolina. She is currently a member of the Wingate University Board of Trustees and the North Carolina Library Commission.

She has been a recipient of the Citizen of the Year award by the Eden Chamber of Commerce and was awarded the Order of the Long Leaf Pine by former North Carolina Governor James B. Hunt. She is a member of the First Baptist Church of Eden and the Women's League of Eden.

Maddrey's term ends June 30, 2011.

## Respiratory Therapy Club Collects Donations for Local Food Banks

The Respiratory Therapy Club will be collecting non-perishable food items Nov. 12 through Nov. 21 for local food banks. Please place your donation in the boxes located at the entrance to each building.

## Workshop and Concert Feature "Harmonicas and Humor"

The Musicians' Guild will sponsor a workshop and concert by Mel Jones on Thursday, Nov. 29.

Mel Jones, who has achieved prominence as a harmonica player, performer, humorist, and raconteur, will lead a workshop on "Harmonica and Humor: Techniques and Performance." The workshop will be held in the Activity Room of the WSC from 12-1 PM.

That evening, Mel will return with his band, "Mel Jones and His Bag O' Bones," to present a full-length concert at 7 PM in the college auditorium. Both workshop and concert are free and open to the public.

## Here's How to Overcome Your Fear of Foreign Language!

Does the thought of jumping into a college-level foreign language course seem more than a little intimidating? Has it been years since you studied a foreign language in high school?

Perhaps what you need is an introduction to a foreign language without the pressure and pace of a college-credit course. SPA 110, introduction to Spanish, could be just the course you need.

SPA 110 was begun in the fall of 2003 to provide a slower-paced, less rigorous introduction to Spanish. Although this course does not transfer to a university, it gives students a foundation that will help them succeed in the college transfer classes. Several sections of this class have been offered over the past few years, and many of the students have continued successfully in SPA 111. The course meets for two hours a week and carries two hours of credit. For Spring 2008, there is one section offered for two hours a week for the entire semester and one section offered two hours two mornings a week for the second mini-mester. Basically, SPA 110 covers about 40% of the content of the college transfer SPA 111. The slower pace and reduced content make it much less intimidating to students who have never had any experience studying a foreign language or who struggle academically already.

"Because SPA 111 is a college-transfer course, we strive to maintain the same standards that could be expected in a beginning Spanish course at a four-year university," says Spanish instructor Christina Wood. Although RCC does not require foreign language for admission, all UNC-system schools require at least two units of a foreign language for admissions. Such requirements may present real barriers for students who have no experience whatsoever in the study of any foreign language. Other students may be struggling with English taking developmental English and/or Reading. Some students either did not take a foreign language in high school or took it many years ago and have forgotten most if not all of what they learned.

"It has been our experience that many students in the situations described above struggle with

Mel Jones began his musical career as a touring drummer and singer for bands performing rock and roll and R&B all over the Southeast. When he discovered the hotbed of bluegrass and old time music deep in the heart of Western North Carolina, Mel picked up the harmonica and ventured into a new realm of music.

He formed the first Bag O' Bones and the Piedmont blues duo of Wicker and Jones with finger style guitarist Danny Wicker in the early 1990s and began a new career in acoustic music. Today, Jones fronts a fine band of musicians who are not only connected to traditional blues but who combine many musical influences to create well-rounded performances. The "Bones" have taken on many forms to become masters of a distinctive acoustic sound combining blues, jazz, humor, and old time music. Jones has established himself as one of the region's best harmonica players by winning numerous titles in regional festivals and earning a solid reputation for showmanship. He is also an accomplished song writer whose recordings (*Livin' Bones*, *Blues from the Porch*, *When the Alligators Come to Town*, and *Bones to Pick*) feature much of his original work.

Jones is equally at home covering tunes by Ray Charles, Willie Dixon, Hank Williams, Muddy Waters, or George and Ira Gershwin. His homegrown humor shines through on original recordings such as "Plumbing Blues" and "Dime Store Glasses."

the content and pace of the college transfer Spanish classes," noted Wood. "Many get discouraged and drop. Others stick it out and earn a D or F that ruins their GPA and causes them to avoid taking any more Spanish classes."

Although SPA 110 is not a prerequisite for SPA 111, Wood recommends it for the following groups:

- Students who have no foreign language experience
- Students who have been developmental students and who still struggle with English
- Students who took a foreign language in high school but were not successful or struggled greatly
- Students who have been out of school for a while

If you have any questions or concerns about taking Spanish courses, please contact Christina Wood (ext. 2193), Leigh Chadwick (ext. 2228), or Stacey Davis (ext. 2139).

## James Library Offers "Food for Fines"

by Mary Gomez

Technical Services Librarian

Here's your chance to return that book (or Math DVD), save a little cash, and make sure your neighbors don't go hungry this holiday season. The James Library will be running its 4th annual **Food for Fines** program from November 1 through December 14. All you have to do is bring in nonperishable food items and you will receive \$2 off library fines for each food item, up to a maximum of \$20. So if you owe a \$10 fine on that math DVD, bring in 5 cans and you are off the hook. We won't even give you that "tsk-tsk" look you probably deserve.

Offer is valid on overdue fines only and all items must be returned to take advantage of the deal. All food will be donated to local food banks. If you don't owe fines and still want to help, we are happy to accept any and all donations of food items.
