PHARMACY TECHNICIAN COURSE DESCRIPTION

The Pharmacy Technician Training program is designed to provide instruction in accordance with the guidelines of the Pharmacy Technician Certification Board (PTCB) on topics applicable to medications, patient safety and quality assurance, order entry and processing, and federal requirements related to pharmacy practice. Through an in-depth integrated curriculum addressing these topics, students will learn what is required to work in both retail and institutional pharmacy settings to safely dispense medication to patients under the supervision of a licensed pharmacist. Students successfully completing the program receive certificates and will be eligible to take the Pharmacy Technician Certification Examination (PTCE). Upon achieving a passing score on the PTCE, PTCB will award the Certified Pharmacy Technician credential, CPhT, a professional credential recognized throughout the practice of pharmacy.

This class meets both in the classroom and online.
Students must have easy access to a high-speed internet connection.
