Fire/Rescue Training

Live Structural Burn Training Procedures:

Purpose: To prevent any unsafe act that may cause injury or death to any participant of the training exercise; and to prevent any environmental disturbances and/or hazards (smoke, ash, heat damage, and etc.) to anyone or thing around or near the training site.

- Live structural burn training must be set-up with the Fire/Rescue Training Coordinator 15-days prior to the burn date.
Required Information:
 - Name of Lead Instructor (must be a Live Burn Specialist)
 - Lead Instructor's e-mail address
 - Lead instructor's phone number (daytime number)
 - Date of training
 - Time of training
 - Physical address of structure to be burned
 - Name of fire district that the structure is located

- Notification of the date, time and location must be made 7-days prior to the burn by the fire district conducting the live structural burn training to property owners within 1000 feet of the structure to be burned.
 - Option: print an information sheet and have the fire department distribute this information. (Upon request the college will provide the information sheets.)
**Please note it is unlawful to place anything in a mailbox.*

- Fire districts must follow the procedures listed in *NFPA 1403 Standard for Live Structural Burn Training* and any other rules that apply from the *NC Fire and Rescue Commission*.

- Fire districts must use the N.C. Fire and Rescue Commission Live Fire Training Audit Form (checklist per NFPA 1403 and the NCFRC). *This audit form can be obtained from the NCSFM or RCC's web-site.

- Before and after pictures of the condition of the structure(s) and surrounding area. (This is to include any and all exposures).

- A copy of all documents must be submitted to the college coordinator prior to the burn. (Post burn pictures to be turned in within 7 days after the burn).
